

INTEGRATED SYSTEM PLATFORMS

INTEGRATED SYSTEM PLATFORMS

Multi-role integrated platform, equipped with a shelter housing a power generator unit and electronic equipment. The system features two telescopic masts: one with an extension up to 11 m, and a second mast with an extension up to 8 m, also equipped with a tilting function. The platform is also fitted with an UPS system, a levelling, loading /unloading and stabilizing system, ensuring rapid deployment and operational mobility.
