

ISO 20 FEET SHELTERED SYSTEMS

ISO 20 FEET SHELTERED SYSTEMS

Sheltered system for tactical or logistical purpose, featuring an anti-torsion frame designed for vehicle transport and equipped with leveling/unloading systems for rapid deployment. The platform can be used for the implementation of energy stations, integrated systems (such as command and control solutions), and can be equipped with telescopic masts, air-conditioning systems, and cooling systems for electronic equipment.

The configuration is fully modular and customizable, according to the customer's specific operational requirements.
